

# You're all talking about clouds.

We're designing them.

IaaS Design and Build

Shape

We're supporting them.

CloudStack Infrastructure Support

Blue

We're training people how to use them.

CloudStack Bootcamp Training

**ShapeBlue are expert builders of public and private IaaS clouds and are the leading global integrator of Apache CloudStack™.**

ShapeBlue provides a range of strategic and technical consulting and implementation services to help IT Service Providers and enterprises build profitable, scalable IaaS clouds. We have built a set of best practices around the core technologies, and also the design of storage, network and compute for cloud environments. ShapeBlue are active members of the Apache CloudStack project and founding members of the CloudStack European user community

**IaaS Design and Build** ShapeBlue are specialists in design and implementation of IaaS cloud infrastructures, combining extensive experience in complex network, storage and compute infrastructures with globally leading skills in CloudStack, Citrix CloudPlatform and Citrix CloudPortal. Due to this experience we can advise on networking and storage technologies ideally suited to the build-out of Clouds. We can also plan integration of the platform into your billing system, monitoring platforms, CRM tools, web portals and other software components.

**CloudStack Infrastructure Support** Our Support Service provides 24/7 'follow the sun' 2nd – 4th line remote support of your entire CloudStack infrastructure. Our engineers are experts in CloudStack, and many are contributors in the Apache CloudStack project. Our engineers have worked with us building some of the world's largest CloudStack infrastructures, and regularly work with enterprises around the world trouble-shooting production environments. ShapeBlue are the only global provider of support services to Apache CloudStack.

**CloudStack Training** Fast paced training courses will give you the core skills needed to build and operate a CloudStack cloud. Our instructors all have real-world CloudStack implementation experience and are regular contributors to the Apache CloudStack project. The courses are a combination of instructor led learning and hands-on labs. We currently offer 2 day classroom based courses in London UK, Bangalore India and Sao Paulo Brazil, as well as Online, instructor-led Courses run over a 5 day period.
